

HELP YOUR TEAM EXPLAIN CLEARLY, HANDLE TOUGH QUESTIONS AND WIN CUSTOMER CONFIDENCE

Build Teams That Explain Clearly. Prepare Them for Real Conversations.

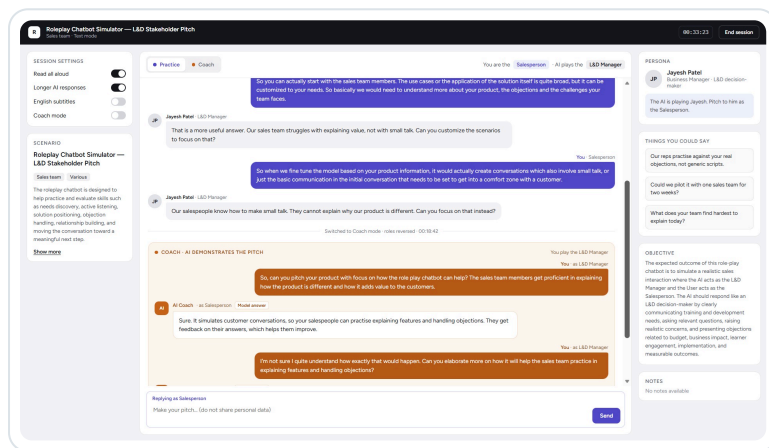

Knowing a product is not the same as explaining its value. MeVn.ai Roleplay turns your product knowledge, policies and SOPs into realistic practice with AI customers and colleagues who bring different personalities, questions and objections — in 62 languages. Then it shows what was said, what was missed and what to improve before the next real conversation.

Move beyond memorised scripts to listening, articulating and responding with purpose.

COMMUNICATION PRIORITIES

- Clear Articulation
- Active Listening
- Objection Handling
- Audience Adaptation
- Multilingual Practice
- Actionable Feedback

ROLEPLAY STUDIO & LEARNER INSIGHTS

ONE PRACTICE CYCLE, KNOWLEDGE TO CONVERSATION

Create → Practise → Review
→ Repeat → Improve

Turn your company's documents into the scenarios your team actually faces. Set the roles, personalities, goals and talking points that matter.

- PRACTISE** Explain, question and respond to realistic AI personas
- REVIEW** Hear your delivery; spot gaps in your answers
- IMPROVE** Apply specific recommendations next attempt

COMMUNICATION CAPABILITIES

- 1 Explain your actual offering** — practise with your product information, policies and SOPs, not generic sales scripts.
- 2 Adapt to different personalities** — sceptical buyers, analytical decision-makers, impatient customers.
- 3 Practise in 62 languages** — rehearse in the languages employees and customers use at work.
- 4 Articulate complex ideas simply** — structure answers and choose words that suit the listener.
- 5 See what your answer missed** — words used, key terms missed, talking-point coverage and relevance.
- 6 Hear how you came across** — replay recorded audio; review pronunciation, fluency and other speech feedback.*
- 7 Make the next attempt better** — strengths, prioritised recommendations, examples and progress across attempts.

SOLUTION · 4 CONNECTED CAPABILITIES

Company-Specific Scenarios

Rehearse the conversations behind your products, processes and customer challenges.

Realistic AI Roleplay

Handle questions and objections from different roles and personalities.

Voice + Text Analytics

Connect what was said with how it was delivered — and what was left out.

Feedback + Repeat Practice

A specific improvement focus for every next attempt.

INDUSTRY-ALIGNED USE CASES

- Manufacturing**
Explain procedures, clarify safety instructions, run precise shift handovers.
- Healthcare & Pharma**
Explain approved product information, answer doctors' questions, communicate with empathy.
- BFSI**
Explain terms and exclusions clearly; handle objections and difficult queries.
- Every Workplace**
Manager feedback, conflict resolution, onboarding conversations and interviews.
